

Nov. 15

Mr. David Borst
706 Sanders Av.
Schenectady 2, N. Y.

Dear Mr. Borst;

I appreciate your difficulties and your lack of time for all of the requests that come in, and I apologize for sending in another. However, the engineers we have interviewed feel that they can do nothing without copies of some of your technical drawings. We are still pressed for time since the student Government is naturally reluctant to give us money for this project until we have an itemized budget. Consequently, I would like to put in a request for the following drawings:

H1004
H1038
H1081
H1098
H1105
H1109
H1110
H1119
H1120
H1123

We would only have to keep these drawings for twenty-four hours at the most and will return them to you at the end of that time. Enclosed is a map of the conduit system of the campus. I apologise again for bothering you, but I hope we can borrow the drawings since we can return them so quickly.

Sincerely,

Grace Marshall
